AWS: S3 | EC2 | ECR

Built Technologies

Senior Mobile Engineer
2021 - Present
TypeScript | React | Ionic | iOS | Android

- Effectively worked in 3 different codebases supporting both an iOS and Android app with a very small (and sometimes solo) team.
- Built multiple Web -> Native Mobile plugins from scratch that were incased in a single internal npm package.

Lextech

Senior iOS Engineer
2018 - 2021
iOS

- Worked with multiple teams with varying levels of experience to ship Fortune 500 level company internal employee apps and sometimes app suites.
- Lead 3 junior engineers with no prior iOS experience to a successful app launch as a mentor/project lead.
- Shipped an app that was mostly SwiftUI with a widget very shortly after those features were announced/released.

FusionCorp

Mobile Developer
2017 - 2018
iOS | Android

- Managed multiple iOS and Android apps mostly solo from concept to deployment to the App Stores.
- Built internal company iOS and Android libraries deployed through Cocoapods and Maven.

Lockheed Martin

Software Engineer Associate
2016 - 2017
DXL | VBA

- Assisted the Systems Engineering department with helpful scripts inside IBM DOORS
- Built a full fledged tool for graphing data inside Excel with VBA and exporting to PDF for presentation.
