Experience

Staff Software Engineer @ Purchaser; Lexington, KY — Nov 2024-Present

- Own full-stack product development, implementing customer-facing features end-to-end across React, TypeScript, Bun, backend services, and cloud infrastructure (Terraform).
- Designed and expanded a shared AI platform integrating multiple LLM providers, tool calling, streaming responses, and reusable abstractions that accelerated AI feature development across the product.
- Partnered with product and design to rapidly prototype, iterate, and ship AI-powered experiences from concept to production.
- Led adoption of AI-assisted development workflows, enabling non-engineering teammates to meaningfully contribute production-ready features using Claude Code and Codex while establishing engineering best practices.
- Drive architectural decisions around AI systems, balancing developer experience, maintainability, and rapid product iteration in a fast-moving startup environment.

Lead Mobile Engineer @ Built; Lexington, KY — Oct 2021-Oct 2024

- Led technical direction for the company's mobile platform migration from Ionic to fully native iOS and Android applications.
- Architected modern mobile infrastructure including CI/CD pipelines, testing strategy, linting standards, and release automation.
- Mentored engineers while establishing engineering standards for native mobile development.
- Worked with and became extremely familiar with TypeScript frontends and backends to be knowledgeable about the entire stack.

Senior Mobile Engineer @ Lextech; Chicago, IL — Jul 2018-Oct 2021

- Led engineering efforts across multiple Fortune 500 mobile applications from planning through production release.
- Mentored numerous junior engineers, enabling successful delivery despite no prior iOS experience.
- Early adopter of SwiftUI upon release, shipping one of the company's first production SwiftUI applications and widgets.

Mobile Engineer @ FusionCorp; Lexington, KY — Aug 2017-Jul 2018

- Owned the full software development lifecycle from initial concept and UI prototyping to final deployment on the Apple App Store and Google Play Store for multiple apps.

Education

University of Kentucky — May 2012-May 2016

B.S. Computer Science, Minor in Mathematics

Skills / Engineering Profile

- Product-minded Staff Software Engineer with 10+ years of experience building customer-facing software and owning features end-to-end.
- High-agency generalist who quickly learns new languages, frameworks, and technologies to solve the problems that matter most.
- Experienced building production AI applications, LLM integrations, AI-assisted user experiences, and reusable AI infrastructure.
- Strong full-stack engineer with deep experience in TypeScript, React, Bun, backend architecture, APIs, and scalable distributed systems with a long career in iOS and Android development covering the full client-side spectrum.
- Rapid prototyper who enjoys experimenting with emerging AI capabilities and turning ideas into reliable production systems.
- Thrive in fast-paced startup environments, taking ownership of ambiguous problems and shipping high-quality software with speed.
